TOP 10 CHECKLIST

1

Does your label claim match what you tested in your efficacy report? Be specific!

2

Did you put your label in the new AAPFCO format?

3

Did you provide 2 datasets for each claim?

4

Did you provide a written rationale for your crop groups or lack of crop groups (e.g., use in all crops)

5

Did you explain the variability of your dataset with descriptive statistics?

6

If using NUE, did you explain how you are defining NUE and conduct your statistical analysis on NUE?

7

Is 50% of your data from the US (for yield and quality claims)?

8

Did you test for heavy metals, e.coli, and salmonella?

9

If your product contains plant nutrients, did you use a positive control with the plant nutrient?

10

Did you explain your high p-value or other statistical anomalies?
